29 March 2010

Offshore Hydrocarbon Mapping plc ("OHM")

Award of Marine CSEM contracts for customers in India; combined value approximately US\$ 6 million

Offshore Hydrocarbon Mapping plc (AIM:OHM), is pleased to announce that it has been awarded two contracts for the supply of marine electromagnetic surveys for clients in India, with a combined value of approximately US\$6 million. The OHM Leader, a state-of-the-art vessel for conducting safe and reliable CSEM operations, is currently being mobilised for the surveys with the first due to start in April.

Richard Cooper, Chief Executive Officer of Offshore Hydrocarbon Mapping commented:

“This will be the first deployment in India for OHM’s unique WISE product which integrates CSEM with a range of other geophysical data. Our clients for these surveys are experienced and sophisticated CSEM users and our leading capabilities in such data integration were a major factor in their decision to choose OHM for this work.

OHM has pioneered the use of CSEM within an integrated seismic interpretation framework using our WISE products; as a result we are seeing renewed interest in using CSEM for both exploration and exploitation applications.”
